

# Exhibition & image reference

## Artwork identification

Each series portfolio and CSV checklist uses the same plate references. Use these references when selecting works. Series years are not assumed to be individual production dates. Blank checklist fields mean the information is not recorded in the current source material.

## Images and reproduction

Images © Nermine Hammam. All rights reserved. For reproduction, licensing or press use: [info@nerminehammam.com](mailto:info@nerminehammam.com). The downloadable reference-image set contains the existing website JPEGs at their actual pixel dimensions, with no enlargement. It is suitable for research and selection; publication suitability depends on the intended print size. Download access does not grant reproduction permission.

## Physical works and installation

Recorded dimensions appear in the individual portfolios and checklists. They are not identified as framed dimensions unless explicitly recorded. Final framing, mounting, weight, hanging hardware, packing, lighting, available editions and loan availability require confirmation for the selected works. This reference is not an approved installation specification.

## Moving image

Viewing links are available in The Moving Image section of the website. Exhibition masters, duration and format verification, playback equipment, projection or monitor requirements, sound, looping, subtitles and screening permissions must be agreed for the selected work. No technical rider is supplied where the source records do not establish these requirements.
